

EX 5:-

Sudo Buffer Overflow

Aim:-

To perform Sudo Buffer Overflow

Tasks:-

Room completed (100%)

Now it's your turn.

SSH into that machine you deployed earlier, **using port 4444**.

The credentials are:

Username: tryhackme
Password: tryhackme

If you're using Linux, the command will look like this:

```
ssh -p 4444 tryhackme@WACHINE_IP
```

Answer the questions below

Use the pre-compiled exploit in the VM to get a root shell.

What's the flag in /root/root.txt?

How likely are you to recommend this room to others?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10

Result: Hence the flag was found successfully.
